The Support of RFEU

Businesses can register with RFEU with complete documents to get assistance for availing the benefits and funding. Necessary support in terms of training, grooming, investigation, and technical support will be given. Again, all kinds of support will be easily available along with expert assistance.

ABOUT US

Rashtriya Fisheries Enforcement Unit is a unified platform for independent fisheries to connect with the resources and benefits and utilize the financial assistance offered. The objective of this platform is to support the fishery sector so that it becomes one of the strongest pillars of the Indian economy. The fishery sector nurtures 28 million fishers and fish farmers directly. Now, this platform is created to extend help to fishers and individuals working in the fishery industry. Registering on this platform will give individuals and businesses access to multiple benefits offered by the nation.

WHAT IS RFEU?

Rashtriya Fisheries Enforcement Unit was created to serve as a platform to connect the independent fisheries with benefits and resources. As India has numerous water bodies, fisheries here have a bright future. Steps are taken to promote and develop the fishery sector, making it one of the strongest pillars of the Indian economy.

Mission

RFEU has this dedicated site to offer the fisheries, fishermen, fish farmers, and other individuals working in the fishery sector with relevant information about fisheries and aquaculture. Fisheries and aquaculture are important sources of food, nutrition, and employment in India. Millions of fishers and fish farmers benefit from this sector. Because of this sector's potential to improve the Indian economy, tremendous benefits to individuals and organisations working in this sector are offered.

Vision

To support these initiatives, RFEU has launched this site to bridge the gap between the resources and the individuals working in the fisheries sector. RFEU showcases different funding schemes to the beneficiaries so that they can avail themselves of the numerous benefits, including monetary sponsorship. There are many individuals working in the sector who do not have sufficient knowledge about what the nation thinks and plans for them. Similarly, many private organisations do not have any specific idea about what benefits they can avail and how they can improve their business with the help of funding.
